Tabla de Integrales (Básica)

https://lelopezm.wordpress.com

Reglas de integración

Sean $\mathbf{u} = \mathbf{u}(\mathbf{x})$, $\mathbf{v} = \mathbf{v}(\mathbf{x})$ dos funciones en x y sea \mathbf{k} una constante. Entonces:

•
$$\int [\mathbf{u}(\mathbf{x}) \pm \mathbf{v}(\mathbf{x})] dx = \int \mathbf{u}(\mathbf{x}) dx \pm \int \mathbf{v}(\mathbf{x}) dx$$

Integrales de funciones básicas

En esta sección se considera a u respecto a la variable que se integra.

1.
$$\int u^n du = \frac{u^{n+1}}{n+1} + C, n \text{ una constante.}$$

2.
$$\int a^u du = \frac{a^u}{\ln a} + C$$
, a una constante.

$$3. \int \sin u \ du = -\cos u + C$$

$$5. \int \tan u \ du = -\ln|\cos u| + C$$

7.
$$\int \sec u \tan u \ du = \sec u + C$$

$$\int \frac{du}{u} = \ln|u| + C$$

$$\int e^u du = e^u + C$$

4.
$$\int \cos u \ du = \sin u + C$$

$$6. \int \cot u \ du = \ln|\mathrm{sen}u| + C$$

8.
$$\int \csc u \cot u \ du = -\csc u + C$$

9.
$$\int \sec u \ du = \ln|\sec u + \tan u| + C$$

11.
$$\int \sec^2 u \ du = \tan u + C$$

13.
$$\int \frac{1}{u^2 - a^2} du = \frac{1}{2a} \ln \left| \frac{u - a}{u + a} \right| + C$$

15.
$$\int \frac{1}{\sqrt{a^2 - u^2}} du = \operatorname{sen}^{-1} \left(\frac{u}{a} \right) + C$$

10.
$$\int \csc u \ du = -\ln|\csc u + \cot u| + C$$

$$12. \int \csc^2 u \ du = -\cot u + C$$

14.
$$\int \frac{1}{u^2 + a^2} du = \frac{1}{a} \tan^{-1} \left(\frac{u}{a} \right) + C$$

16.
$$\int \frac{1}{\sqrt{u^2 \pm a^2}} du = \ln \left| u + \sqrt{u^2 \pm a^2} \right| + C$$
